Toomey Landscape

A design partnership with you.

“A beautifully planned landscape increases the value of your home and adds warmth, color and structure,” says Jeff Toomey. Since 1996, that philosophy has taken Toomey Landscape to the top of the market providing homeowners and businesses throughout the seacoast region with landscapes that increase the beauty and value of their properties for decades to come.

We are a full service design/build company. We follow a client every step of the way, from the initial consultation, on through to the design and construction.

Jack Tremblay, our Registered Landscape Architect on staff, creates the plan, while Toomey oversees its implementation. Our aim is to design a landscape that is as appropriate to our client’s lifestyle as it is the homes’ architecture and natural surroundings.

We continually stay on the "cutting edge" of the landscape and construction fields by incorporating innovative techniques and materials. Knowledge, experience and a sensitivity to fine detail will assure the construction of quality landscapes and structures.

While known for their work for private residences, one commercial project of particular significance for Toomey is 2 International Place, located at the Pease Tradeport. Toomey noted, “It was a pleasure to work with the developers in what has become one of the most recognized buildings in Portsmouth, embodying the redevelopment of Pease. Our best results have always been achieved through a coordinated team effort.”

Toomey has enjoyed living in the seacoast area for the past 16 years, and considers it the ideal place to balance work and family. “From mountains to the ocean, winters into summer, there is always something beautiful and unique around us. It's what makes New Hampshire so special.”
